Who Are We?

With more companies moving their production to China, compromising quality along the way, J Nicole by Jennifer Nicole Collection was created with a goal of providing luxury and quality leather products to their customers. Designer and Co-Founder Jennifer Lehmkuhl started creating her brand with form and function in mind, shying away from the latest trends to focus on designs that create a classic look with unbeatable quality. The entire collection of handbags are hand made from start to finish in Tuscany, Italy, bringing back the luxury of Italian craftsmanship by our manufacturer who has supplied to several of the top 30 luxury brands.

Jennifer not only wanted to create a line of handbags but a brand with a message behind it. With that in mind, she carefully crafted her brand to follow three aspects: Live, Work, Play and created products that could easily fit in every aspect of your life, not only creating a luxury product but giving them meaning. J Nicole by Jennifer Nicole Collection gives customers a piece of mind with their promise of affordable luxury.
